List of Contents

NUMBER 1

Hong-Xue Shang and **Hao-Jiang Ding**	1	Low cycle fatigue stress–strain relation model of cyclic hardening or cyclic softening materials
J. R. Matthews	11	On the relationship between shear lip, shear index and energy in dynamic tear specimens
J. J. Golecki and **D. Ornai**	25	Extension fracture due to collinear cracks
Xu-Dong Li and **L. Edwards**	35	Theoretical modelling of fatigue threshold for aluminium alloys
X. J. Zheng, G. Glinka and **R. N. Dubey**	49	Stress intensity factors and weight functions for a corner crack in a finite thickness plate
Han Xue-Li and **Wang Duo**	63	The crack problem of a fiber–matrix composite with a nonhomogeneous interfacial zone under torsional loading—Part I. A cylindrical crack in the interfacial zone
L. Chattopadhyay and **R. N. Ghosh**	71	CLIP: computer software for creep life prediction of engineering materials
H. Altenbach and **A. Zolochevsky**	75	A generalized failure criterion for three-dimensional behaviour of isotropic materials
N. K. Salgado and **M. H. Aliabadi**	91	The application of the dual boundary element method to the analysis of cracked stiffened panels
Y. Huang and **E. Stein**	107	Shakedown of a cracked body consisting of kinematic hardening material
K. W. Kpegba, N. Ottavy and **R. Souchet**	113	Stress intensity factors in two-dimensional crack problems by using the superimposed meshes method
S. I. Yemelyanov	127	The step fracture analysis based on the energy balance equation in integral form
Wei Hua Tai	141	Computer simulation of plastic damage evolution in cracked body of low-carbon steel
R. Kumar, A. Kumar and **K. Singh**	147	Effect of rest time after application of single overload cycle on fatigue life
		Technical Notes
K. Rajanna, B. Pathiraj and **B. H. Kolster**	155	X-ray fractography studies on austenitic stainless steels
S. Chattopadhyay, L. Chattopadhyay and **S. Banerjee**	167	The K-calibration and standardization of ceramic specimen
	I	Software Survey Section

NUMBER 2

Kewei Xu, Naisai Hu and Huijiu Zhou	171	Prediction of notch fatigue limits in a compressive residual stress field
Chen Weijiang and **Tang Renji**	177	Cauchy singular integral equation method for transient antiplane dynamic problems
K. W. Lo, T. Tamilselvan, K. H. Chua and **M. M. Zhao**	189	A unified model for fracture mechanics
J. T. Wang and I. S. Raju	211	Strain energy release rate formulae for skin–stiffener debond modeled with plate elements
J. Jäger	229	Kalker's method applied to some improper integrals in fracture mechanics
Shen Lianxi and Yu Shouwen	239	Mechanics of dilatant transformation in one side of bimaterial interface
A. Arslan and **R. Ince**	249	The neural network approximation to the size effect in fracture of cementitious materials
W. Schütz	263	A history of fatigue
		Technical Note
K.-C. Wan, G. S. Chen, M. Gao and **R. P. Wei**	301	On the conventional K calibration equations for single-edge-cracked tension specimens
	I	Software Survey Section

NUMBER 3

H. Y. Jung and **S. D. Antolovich**	307	Fatigue crack closure as a function of crack length in Al–Li alloys
J. E. Bolander, Jr, T. Shiraishi and **Y. Isogawa**	325	An adaptive procedure for fracture simulation in extensive lattice networks
A. Carpinteri, C. Scavia and **G. P. Yang**	335	Microcrack propagation, coalescence and size effects in compression
M. Futakawa and **N. Butler**	349	A homologous ductile failure criterion for generalized stress states
J. Bialkiewicz and **H. Kuna**	361	Shear effect in rupture mechanics of middle-thick plates
I. S. Raju, R. Sistla and **T. Krishnamurthy**	371	Fracture mechanics analyses for skin–stiffener debonding
O. Ye. Andreykiv, M. V. Lysak and **V. R. Skalsky**	387	Method of accelerated evaluation of K_{1scc} under stress corrosion cracking

K. M. Lin, H. C. Lin and K. C. Chen 395 Extended dislocations around a semi-infinite crack

S. Yang, F. G. Yuan and X. Cai 405 Higher order asymptotic elastic–plastic crack-tip fields under antiplane shear

C. Petit, A. Vergne and X. Zhang 423 A comparative numerical review of cracked materials

Technical Note

N. I. Ioakimidis 441 The equation of caustics in cartesian coordinates for mixed-mode stress intensity factors

i Software Survey Section

NUMBER 4

J. L. Grenestedt, S. Hallström and J. Kuttenkeuler 445 On cracks emanating from wedges in expanded PVC foam

K. Rajanna, B. Pathiraj and B. H. Kolster 457 Some studies on the influence of stress ratio and test temperature on X-ray fractography observations in C45 steel specimens

Bo Wang and Keh-Chih Hwang 471 Structural integrity assessment in elastic–plastic fracture

B. A. Cheeseman, M. H. Santare and B. J. O'Toole 479 Flexural failure of notched curved composite beams

J. R. Donoso and J. D. Landes 499 The common format equation approach for developing calibration functions for two-dimensional fracture specimens from tensile data

S. Bentachfine, G. Pluvinage, L. S. Toth and Z. Azari 513 Biaxial low cycle fatigue under non-proportional loading of a magnesium–lithium alloy

S. Das and B. Patra 523 Moving Griffith crack at the interface of two dissimilar orthotropic half planes

M. A. N. Shabara, A. A. El-Domiaty and M. D. Al-Ansary 533 Estimation of plane strain fracture toughness from circumferentially bluntly notched round-bar specimens

K. S. Wang, S. T. Chang and Y. C. Shen 543 Dynamic reliability models for fatigue crack growth problem

Shau-Hwa Yang and Wen-Hwa Chen 557 Free vibration analysis of patched cracked composite laminates using a multilayer hybrid-stress finite element method

A. N. Das	569	An elastic quarter space with an extending crack
Chai Guozhong, Zhang Kangda and Wu Dongdi	579	Analyses of embedded elliptical cracks in finite thickness plates under uniform tension
		Technical Notes
J. Z. Zuo, Z. W. Lou and Z. B. Kuang	589	A yield function for porous ductile materials
Z. Yosibash and B. A. Szabó	593	A note on numerically computed eigenfunctions and generalized stress intensity factors associated with singular points
X.-M. Wang, S. Gao and Y.-P. Shen	597	Discussion on the neutral angle of macrocrack–microcrack interaction
	i	Software Survey Section

NUMBER 5

H. E. Ang, J. E. Torrance and C. L. Tan	601	Boundary element analysis of orthotropic delamination specimens with interface cracks
J. R. Donoso, F. Labbe and H. Argomedo	617	A calibration function for notched cylindrical tension specimens, based on the common format equation: numerical and experimental data analysis
Hao Ouyang and Sanboh Lee	629	Screw dislocations near a crack penetrating through an interface
G. Tsamasphyros and D. A. Eftaxiopoulos	639	Energy considerations in the boundary collocation method applied in fracture
G. X. Zhang, G. T. Liu and Y. Wu	653	Harmonic thermal fracture of multiple crack system and the stability of cracks in RCC arch dam
M. Beghini and L. Bertini	667	Effective stress intensity factor and contact stress for a partially closed Griffith crack in bending
H. L. Montenegro, A. Cisilino and J. L. Otegui	679	Application of a weight function based method to assess partially closed cracks
Chai Guozhong, Zhang Kangda and Wu Dongdi	693	Stress intensity analyses on tension of a finite thickness plate with two coplanar semi-elliptical surface cracks
A. Y. T. Leung and R. K. L. Su	703	Fractal two-level finite element method for cracked Kirchhoff's plates using DKT elements
Wen-Hwa Chen and Shau-Hwa Yang	713	Multilayer hybrid-stress finite element analysis of composite laminates with delamination cracks originating from transverse cracking

Zhu Zhe Ming, Ji Sao Cheng and Xie He-Ping 731 An improved method of collocation for the problem of crack surface subjected to uniform load

i Software Survey Section

NUMBER 6

S. Zhang and D. Radaj 743 Forces and stresses in seam welded overlap joints derived from outer surface deformation

Jianqiao Chen and S. Takezono 751 Propagation of small surface cracks in stainless steel at high temperature

D. N. Lal 761 On the combined influences of Young's modulus and stress ratio on the LEFM fatigue crack growth process: a new mechanistic approach

C. D. Liu 791 Analytical stress around mode II crack parallel to principle axis in orthotropic composite plate

H. Wada, M. Seika, T. C. Kennedy, C. A. Calder and K. Murase 805 Investigation of loading rate and plate thickness effects on dynamic fracture toughness of PMMA

J. S. Huang and M. S. Chiang 813 Effects of microstructure, specimen and loading geometries on K_{IC} of brittle honeycombs

B. I. Yun and U. J. Choi 823 Approximate weight function methods using a new condition

H. Bahai, G. Glinka and I. I. Esat 835 Numerical and experimental evaluation of SIF for threaded connectors

K. S. Venkatesha, B. Dattaguru and T. S. Ramamurthy 847 Finite element analysis of an interface crack with large crack-tip contact zones

Chunyuan Zhang 861 On the basic balance laws of non-linear fracture mechanics—II. Non-local theory

Zhu Hua, Fan Tian-You and Tian Lan-Qiao 869 Composite materials dynamic fracture studies by generalized Shmuely difference algorithm

M. R. Bayoumi 879 The mechanics and mechanisms of fracture in stress corrosion cracking of aluminium alloys

Technical Notes

T. Y. Wu, G. Jago, J. Bechet, C. Bathias and D. Guichard 891 Accelerated vibratory fatigue test by ultrasonic frequency at cryogenic temperature

L. Chattopadhyay 897 Size effect on creep energy dissipation during stable crack growth

i Software Survey Section
